Makowhiteness - The First Two Years

Makowhiteness Project is now two years old !

We would like to thank everyone who has supported our company over the last two years and especially our clients and Corporate Members.

The first half of 2009 saw some very difficult times for many companies but we have been able to survive by hosting a conference back in March and by changing our business activities slightly, to include developing the raw materials business for a Chinese supplier - see below for more information.

The last three months have seen strong growth in all areas which we hope will continue.

Corporate Membership

Our corporate members only area of the website now has

the conference proceedings uploaded in PDF format. This along with the technical information already present on the site represents one of the largest collections of up to date information on Optical Brighteners for paper currently available.

For more information please see the web site listed on the right.

Optical Brighteners & Paper Whiteness 2009

For a list of the papers, authors and summaries please go to:

[http://
makowhitenesspro-
ject.com/13.html](http://makowhitenessproject.com/13.html)

For those of you who are not corporate members, there are 2 copies of the conference handouts still available at a price of £225 + p&p, please contact us

and we can arrange online credit card payment or invoice payment if required.

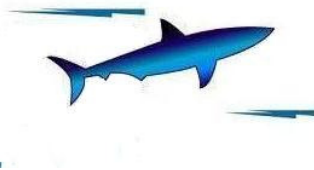

Focus Chemicals

See our article in Focus Chemicals at [http://
www.branschnyheter.se/
papper_massa.php](http://www.branschnyheter.se/papper_massa.php)

Shark Conservation

Makowhiteness donates some of its profits to the Sharks Trust to support the work they do to conserve all species of sharks (not only Mako's !).

10-18 October 2009 is European Shark Week, please visit <http://www.sharktrust.org/>

Raw Materials from China

Makowhiteness is now supporting a manufacturer of raw materials to develop its export business.

We have already helped our client to supply the following products in bulk:

-Diaminostilbene disulphonic Acid

-Cyanuric Chloride

-Aniline disulphonic Acid

We are also working with them to supply various basic chemicals, sourced from China, such as:

-Sodium Hydroxide

-Potassium Hydroxide

-Calcium Chloride

etc

and various dye raw materials such as:

-J-Acid

-Tobias Acid

etc

If you would like to receive further information on these products, or anything else you need that is not listed, please do not hesitate to contact us.
